The City of Santa Barbara (City of SB) is offering rebates for upgrades to irrigation systems and landscaping to increase water efficiency. **PROJECTS MUST BE APPROVED IN ADVANCE. THE PROGRAM IS NOT RETROACTIVE. LANDSCAPES FOR NEW CONSTRUCTION ARE NOT ELIGIBLE.** Sales receipts and/or contractor invoices are required for all rebates. Only the retail cost of material will be rebated.

How Much Is The Rebate?

The program covers a portion of the cost of approved irrigation equipment and landscape materials.

- **Irrigation Equipment:** 50% of the cost of drip irrigation parts, sprinkler system efficiency retrofits, and rotating sprinkler nozzles (1" / hour precipitation rate or less with proper pressure) & pressure regulators.
- **Water Wise Plants and Mulch:** 50% of the cost of water wise plants and mulch. Planted areas must be covered with a 3-inch layer of mulch. Hardscapes and pathways, including decomposed granite, are not eligible.
- **Smart Irrigation Controller:** 50% of cost of a smart irrigation controller. Smart irrigation controllers work on a simple principle: provide the appropriate watering schedule and automatically adjust for weather changes.
- **Performance based rebate program.** Project must result in a net reduction in total landscape water consumption for the site.

Any combination of items above may qualify for a maximum rebate amount of \$2,000 per account serving irrigated area and \$4,000 per site for accounts classified as commercial and multi-family, including homeowner associations.

How Do I Participate?

- Step 1:** Make an appointment for a "Pre-Qualification Inspection" site visit with a Water Conservation Program representative. If your project qualifies, you will receive the pre-qualified list of items eligible for rebate.
- Step 2:** The purchase and installation of all equipment denoted by Water Conservation staff under the heading of "Pre-Qualified Equipment" must be installed within **120 days** of the date of the Pre-Qualification Inspection.
- Step 4:** Call for a final "Post-Installation Inspection" appointment within **120 days** of the date of the **Pre-Qualification Inspection**. Receipts are required for all rebates. Ask your contractor for a separate invoice for materials stating: "Labor billed separately."
- Step 5:** Be ready to show your finished project. Rebate check will be issued within 30 days of final inspection.

TERMS & CONDITIONS

1. The **Applicant** applying for the rebate(s) **must be a City of Santa Barbara water customer.**
2. **Only Pre-Qualified Equipment** as determined by a Water Conservation staff member, upon verification of anticipated water savings, shall qualify for a rebate after installed.
